

Mechanical Bar Screens

max. flow velocity	filtration degrees	water for cleaning	minimum operating pressure
up to 2 m/sec	10 - 100 mm	there is no need	Atmospheric Pressure

Low Cost
High Efficiency

features:

- Small footprint
- Robust Design, low maintenance requirement
- Low capital cost
- Can be easily installed in the channel of which widths varies 0,5 - 2,5 m.
- Silent operation
- Minimised abrasions on the motor and gearbox by one directional movement of the drive mechanism so increased life span of the equipment
- Protected by mechanical torque switch for all kind of overloads
- Fully automated control based on timer or level difference before and after screen
